

Invisalign Full Package Includes:

1. Invisalign Treatment.
 - All records including x-rays and photos as required for your case. Digital scans rather than traditional impressions are taken for greater comfort and accuracy.
 - All review appointments during treatment.
 - Refinement aligners. Once you have finished your aligners we will review the result achieved together and if improvements can be made, or if particular teeth have proven to be stubborn, we will make additional refinement aligners to complete the final movements needed.
2. Dental Monitoring Scan Box and software. Dental Monitoring is the worlds first dynamic aligner tracking system that allows us to virtually track the progress of your treatment. Every week before your aligner change you use the scan box and your smart phone to scan your teeth - the images are uploaded to the cloud where it is analysed by proprietary software and reviewed by Dr Casci. Feedback can also be given and questions asked via the DM app. Dental Monitoring allows for fewer clinic visits, better aligner fit and optimised aligner changes. For more information go to: www.dental-monitoring.com/why-dm/
3. Vivera Retainers. Vivera retainers are 30% stronger than competitor brands allowing for greater durability and better long-term retention. Vivera retainers are provided as a set of three so that you always have a spare should you lose one.
4. Home Whitening. Home whitening kit will be provided at the end of treatment to lighten your teeth and perfect the final result. *Note that brand and whitening packaging may change from time to time or between practices.*

Please note that this package and pricing is only available from Dr Casci and may not be available through other Lumino practices or providers.
